

Grade 10 Math

There are many different pathways students can take once they are in high school. Students should be placed where they will be the most successful.

K&E

1s or 2s

2s and 3s

3s and 4s

All 4s

Math 10-4

(K&E Certificate Route)

Designed for students whose needs, interests, and abilities focus on basic math understanding

Emphasis on practical life skills and using math in everyday life

Math 10-3

Designed for students who are going to go into trades or directly enter the workforce after high school

Emphasis on critical thinking and practical skills required for trades and the workplace

Math 15

OPTION COURSE

Designed for students that could use a refresher on junior high skills and want a brief introduction to some beginning Math 10C concepts before trying Math 10C

Math 10C

For students that can successfully, efficiently, and confidently complete questions involving Linear Equations, Exponents, Polynomials, Linear Relations, and Rational Numbers

Math 10C-AP

For students that enjoy math and are interested in challenging themselves beyond curricular outcomes
